Transitions®

Healthy sight in every light™

THE MOST CONVENIENT WAY TO ENJOY BETTER VISION, INDOORS AND OUT, TODAY AND TOMORROW

Does the glare of the sun cause you to squint and strain your eyes?

Do your eyes sometimes get tired when you're outside?

Do you sometimes have trouble seeing objects when the bright sun is shining?

Transitions lenses are clear indoors and at night but automatically adjust their depth of colour to changing light conditions outdoors. They provide visual comfort and quality at any and every moment, helping you to see better today.

And just like sunblock protects your skin, Transitions lenses help preserve the health and wellness of your eyes for the future by blocking 100% of harmful UV rays, so you can see better tomorrow too.

Transition lenses are suitable for most frames and are available in single vision, bifocal and multi-focal options.
